PROFILE SUMMARY

Software Developer with 3+ years of experience building responsive, scalable, and high-performance web applications using React.js and Next.js. Strong expertise in state management, REST API integration, performance optimization, and modern frontend architecture. Experienced in developing role-based applications, implementing complex business workflows, and integrating backend services with intuitive user interfaces. Focused on writing clean, maintainable code and delivering reliable, user-centric web solutions.

WORK EXPERIENCE

Frontend Developer
App Wizards | Indore October 2025- Present

- Own the architectural migration and scalability of core frontend applications, utilizing Next.js to optimize server-side rendering (SSR) and improve SEO.
- Establish and enforce code quality standards across the frontend team through rigorous code reviews, custom ESLint configurations, and robust TypeScript/JavaScript patterns.

Web Developer March 2024- Sept 2025

Express Solution Labs | Indore

- Built and deployed ERP and SaaS platforms using React.js and Next.js, delivering scalable solutions for business automation, analytics, and reporting.
- Designed and developed RESTful APIs using Node.js and Express.js, along with Next.js API Routes, integrating optimized SQL (PostgreSQL) queries to ensure data accuracy,performance, and scalability.
- Collaborated closely with UI/UX designers, frontend, and backend engineers to implement modern UI/UX best practices, improving usability, accessibility, and overall user engagement.

Frontend Developer
Cubixsys Technologies | Indore September 2023- February 2024

- Designed and implemented scalable frontend components for multiple projects, achieving 95% on-time delivery.
- Developed reusable UI components using React.js and Material UI, improving code efficiency and maintainability.
- Worked closely with cross-functional teams to streamline project workflows and boost collaboration

PROJECT

Learn Linker - https://learn-linker.vercel.app/dashboard

- Developed a role-based Next.js application with RBAC for 3+ user types, implementing granular permissions and secure data access across user-specific workflows.
- Built and integrated core modules for batch management, attendance, marksheets, assignments, timetables, and student dashboards using React and Next.js.
- Integrated AI-powered study notes and test-paper generation through external APIs, with environment-based feature toggles for flexible feature management.
- Designed the database layer using PostgreSQL and Sequelize ORM, combining ORM operations with direct SQL queries and migrations for scalable schema management.
- Implemented secure authentication and authorization using NextAuth, including session management and a teacher invitation workflow with a bootstrap-admin onboarding pattern.
